The MB19-VIM adds Video in Motion (USB playback) and Navigation Control in Motion to 2020 Mercedes GLE vehicles equipped with the MBUX radio. Installation is performed entirely at the radio and VIM is user-activated using the steering wheel Mute button or a wire trigger.

This interface is not Plug'n'Play and will require hardwiring.

Note: Other MBUX equipped vehicles may function as well, and compatibility will be updated when validated.
