The ZEN-F allows the seamless addition of aftermarket amplifiers into compatible vehicles, delivering audiophile-quality sound without compromising the vehicle factory fit, finish or features.

Utilizing the same processing power as NAV-TV's competition-proven M650-GM, the ZEN-F produces a completely flat audio output without any factory time delay or equalization, eliminating the need for summing devices, an audio correction DSP, or the removal of the factory audio compensation microphones.

The **ZEN-F produces a 12 channel analog output with a S/N Ratio of 114dB.**

NOTE: the ZEN-F will replace the factory amplifier. This is an all-or-nothing solution.
