Haptic Vibration Alert module for MDAS-9 Driver Assistance System. This module installs underneath the seat for an additional alert (on top of audible and visual).

The MDAS-9 by Movon is an Advanced Driver Assistance System which provides visual, audible & available haptic vibrations alerts for functions like Pedestrian Collision Warning (PCW), Forward Collision Warning (FCW), Lane Departure Warning (LDW), DVR front / rear recording and more for any vehicle. This system can be installed in any vehicle and records statistics of driving habits which can provide invaluable feedback to fleet-vehicle owners or new drivers alike.
