Total Video Protection for Trucks and Heavy Vehicles

The DR750X-3CH TRUCK Plus is ideal to secure most large commercial trucks. The waterproof infrared rear camera connects to the front unit via a 15m waterproof video cable. This allows to monitor not only the road behind, but also cargo loading and unloading operations. The micro USB interior camera is also equipped with infrared LEDs to capture video of the cabin's interior. The unit includes an optional hardwire kit to take advantage of the Native Parking Mode option. The Power Magic is no longer required. Parking mode is automatically switched on when the vehicle ignition is turned off. Voltage cutoff and timer can be set in the BlackVue App. The unit will support up to 256gb SD card as well as the optional LTE add on module (SIM card not included).
