WARRANTY DISCLAIMER NOTICE! Radio removal, disassembly, installation of Navigation Electronics, and Radio re-assembly / re-installation is the responsibility of the installer. It is recommended that you contact a professional installer that is experienced with proper work methods involving electronics and knowledgeable of specific procedures for radio disassembly, Navigation Electronics installation, and re-assembly / re-installation of the Radio Head Unit in the vehicle. **INSTALLATION DAMAGE TO THE VEHICLE RADIO HEAD UNIT IS EXPRESSLY NOT COVERED UNDER THE PRODUCT WARRANTY.**

Before beginning your installation, familiarize yourself with the installation instructions and the Navigation system components.

CAUTION: It is advisable to disconnect the negative battery cable for 3 minutes before beginning installation, to avoid unintended air bag deployment. Note and record any anti-theft radio codes prior to disconnecting.

**** Please ensure the correct main harness prior to any installation ****

**** Ensure correct main harness prior to any installation to avoid delay ****

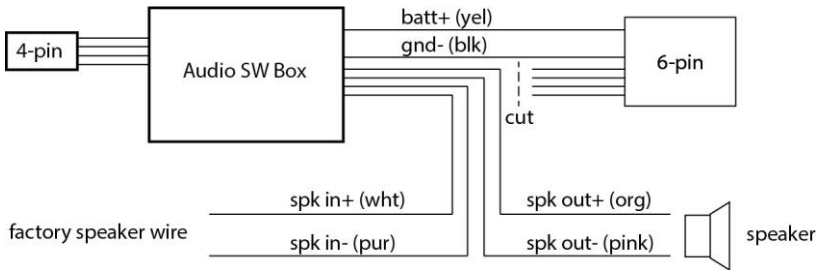

NNG-GM2 (LVDS MYLINK/CUE) 8" Navigation Installation

NNG-GM2 Installation Steps

1. Remove factory radio touch screen assembly from dash
2. Locate (1) video plug and (1) screen power / data plug
3. Plug in the LCD T-harness cable (blue) to factory screen and factory harness
4. Plug in the main Power / Data T-harness (10-pin or 16-pin) to factory screen and factory harness
5. Connect Audio Switch Box to Main Harness (2 connections)
6. Install GPS Antenna (best GPS antenna location is outside the car somewhere - later model GM vehicles have metalized windshields which may affect GPS lock).
7. Connect Power plug to GPS Box (POWER label)
8. Connect LCD (blue) cable to GPS Box (LCD IN / OUT label)
9. Connect A/V harness to GPS Box (A/V label)
10. Connect and install Switch to dash and to A/V harness
11. Connect GPS Antenna to GPS Box
12. Route and connect Speaker T-harness to dash speaker (GM vehicle mostly equipped with dash top speakers, either located at center or driver side of dash. If no dash top speaker is provided, please refer to diagram below for audio integration to factory driver door speaker)

Installation Remarks

1. Addition wires are provided in the Main Harness for testing purpose only. Those wires include Audio Out (3.5mm), Rev Trigger (orange), ACC (red) and Camera Input (RCA). **DO NOT USE THESE WIRE FOR INSTALLATION.**
2. If there is no factory top dash speaker, please make following connection from Audio Switch Box as indicated (see next page).

Camera Setting

Setup Rear View Camera (DO NOT USE DIP SW#1 as camera option)

By default, the rear view camera setting as retain OEM Camera.
For add-on aftermarket camera, please follow the instruction below.

1. Turn off system
2. Set DIP SW #4 to ON (DOWN)
3. Turn on system
4. Go to Navigation Mode
5. Press and hold touch screen for 3 second
6. At the blue screen menu, press setup menu
7. Select Camera option (OEM/Add-on/No Camera)
8. If you need AUX-in, enable the AUX option, otherwise leave it OFF
9. Turn off system and restore DIP SW #4 to OFF (UP)
10. Turn on system

Test system thoroughly before re-assemble of the radio and dash

Test reverse camera function

Test driver side speaker integration function (mute and voice from navigation software)

Trouble Shooting

Please follow all the steps in this installation manual, failure to do so might void the product warranty and damage the factory radio

Power

GPS Module has (2) led lights as indicators when system is power on. Both led lights should lit with good power. If any of the light is dimmed, you should check for B+ and ACC power sources.

Display

No Display

1. There are two led lights at the GPS module to indicate data and power. If led lights are OFF and radio is ON, check the power fuse inside the black box from the main harness
2. Check all wiring connectors for any loose connection
3. Check all wiring shielding for any damage during the installation process
4. Check all wiring for any type of damage
5. Check LCD video cable for loose, misalignment, or damage. Ensure the clip is securely fastened.

No Touch Response

1. Check both Radio mode and NAV mode for touch responses
2. Check led lights for power and data indications
3. Check 10-pin or 16-pin T-harness loose connection, or damage

No GPS software loaded, touch screen alignment screen occurred

Check map SD card at GPS module, see any sign of missing, loose, pop-out, misalignment, or damage

Sound

1. Check all cable for connections to Audio Box for loose, or damage
2. Check software volume settings, ensure volume is not muted
3. Check connections at radio for loose, damaged wires

If you see an error when switching to NAV mode that states: 'OUT OF MEMORY'

'REG 996886x0000' (or any other numbers)

Follow these steps to fix the issue:

1. Access the map micro SD (or standard size SD) card from the module and remove
2. Use an SD card adapter for the PC to load the content
3. Access the map software from the PC from adapt
4. Look for the main folder "NAVI" from the SD card
5. Inside the "NAVI" folder, you should find a folder "SAVE"
6. **Delete the "SAVE" folder from the SD card**
7. Check to ensure the "SAVE" folder is successfully deleted
8. Insert the cleaned SD card back to the module
9. Turn on the system and check all functions. You should see it start with initial setup options and all should be well.
