**EyeRide** is an advanced vehicular video surveillance system with integrated satellite navigation, vehicle sensor reporting and a range of software tools that convey high-resolution real-time video and two-way audio across digital networks to control centers or anywhere an internet connection can be made even to a cellphone.

Using a variety of sensors and cameras fitted to a vehicle, **EyeRide** can constantly monitor vehicles, their drivers, occupants and goods in transit to ensure that valuable assets are protected, that productivity is optimized and that service levels are maintained.

## Car Radio Versions

Any
