manufacturer  
NAV-TV

ID SKU NTV-KIT1013

weight  
3.00 Lbs

market  
USA, Rest of World,  
Europe

### Discover the 4K difference

4K in a dashcam is not a gimmick. It is a game-changer.

It is not about playing videos on a giant screen—although you could do that too. It's about providing video proof.

A dashcam is only as good as its ability to capture crucial details—usually license plate numbers.

The 8-megapixel 4K UHD sensor does just that by capturing 4 times as many pixels as in Full HD.

And with its **fast shutter speed**, details are frozen in place.

Just pause and zoom in.

### Capture everything front and rear

**Front camera: 8 megapixels** CMOS sensor recording in **4K Ultra High Definition** (3840x2160) at 30FPS.

**Rear camera: 2.1 megapixels Sony STARVIS™** recording in Full HD (1920x1080) at 30FPS.

The front camera's **wide 155-degree angle** takes full advantage of the 4K UHD resolution.

The rear camera records in Full HD at a 139-degree angle with outstanding low-light sensitivity.

**Native Parking Mode** with built-in voltage monitor to protect your vehicle battery (hardwiring cable included).

With the free BlackVue Cloud service, check on your car from anywhere, anytime. (*\*Wireless connection required.*)
