BLIND-SPOT Cameras, also known as blinker/turn signal cameras mount beneath the factory exterior mirrors and are most commonly used in conjunction with NAV-TV SVS-6 or MULTI-CAM kits for viewing the user's 'blind spot' when a blinker is activated. Included is the mount which enables the camera to be pointed backwards and directly at the blind spot. For further versatility, this wide angle camera can be swiveled to zero-in the desired image.

This SKU will include a PAIR of cameras.
